

*The top left image shows rigging roof panels to a trailer on the shop floor.*

*The top right image shows on site installation progress right before sheathing the roof.*

*The middle image is of an exterior wall panel built out in the shop with the window installed.*

*The bottom image demonstrates window warranty replacement.*

*My time working for a panelized passive home builder has been a crucial step to understanding building envelopes and building science. The aim is to use these practical skills for a pragmatic approach to design and engineering.*
