## NCMCA GROUP COMPETITION

*In Collaboration With*  
**Megan Robbins and Kristin Noga**

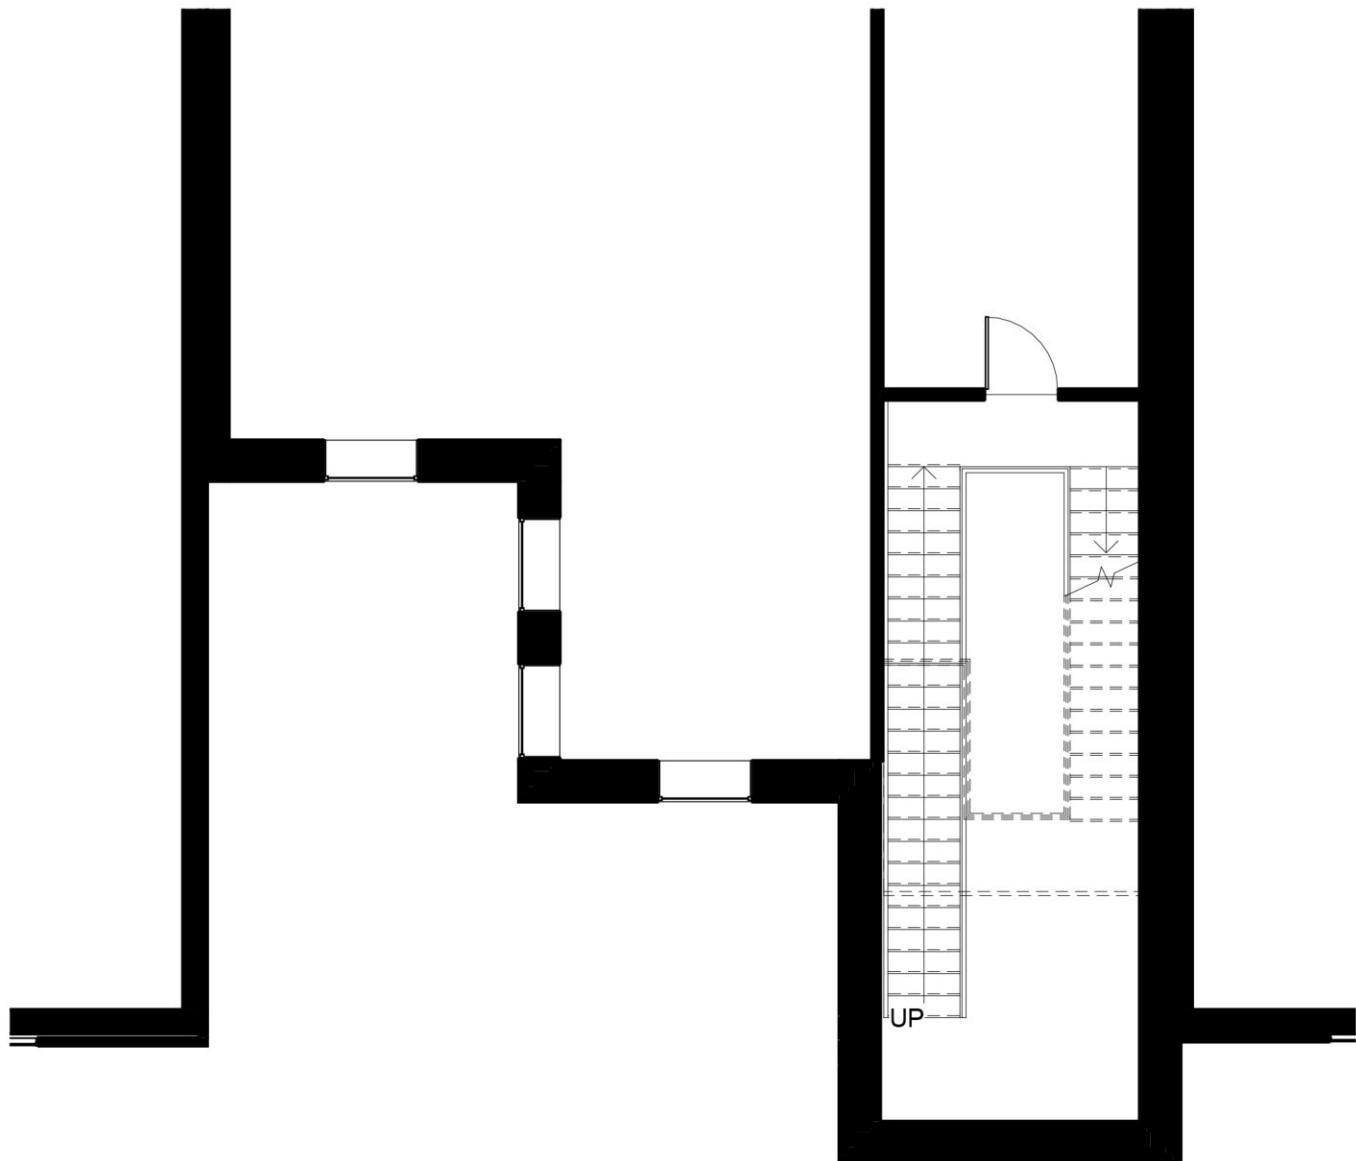

① LEVEL 1  
1/8" = 1'-0"

0 4' 8' 16'  
0 2"  
1/8" = 1'-0"

The NCMCA Competition was a class wide competition focused on creating a downtown brick facade with specific setbacks and dimensions. I worked with Megan Robbins and Kristin Noga to create this project in Revit and I used my Enscape free trial to create detailed renderings. We presented the project together with a poster and won 3rd place.

## WATUAGA LIBRARY GROUP PROJECT

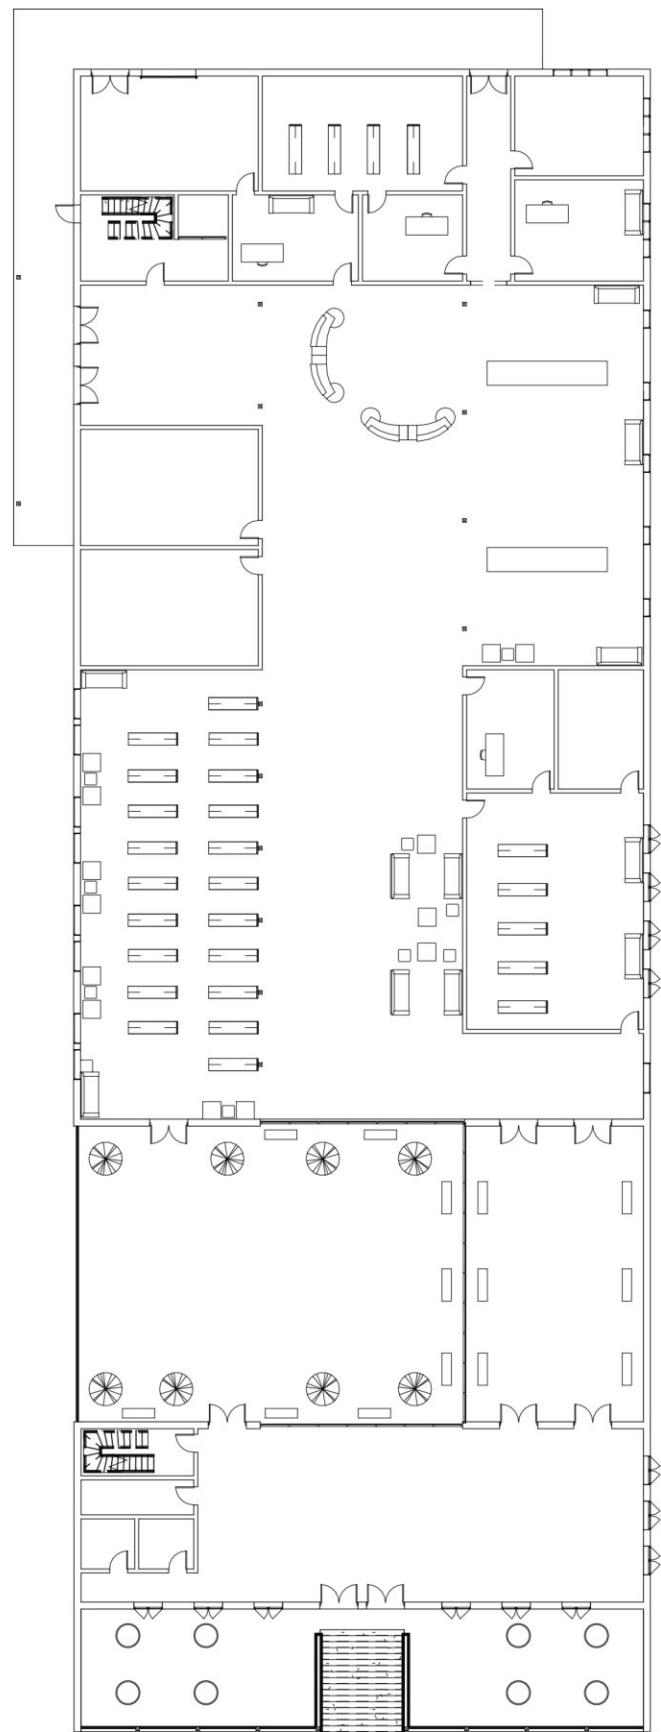

1 Western Elevation  
1/64" = 1'-0"

2 Southern Elevation  
1/64" = 1'-0"

With the same groups as the NCMCA Competition, we were prompted to renovate the Watauga County Library or design a new library from the ground up at the App State Hickory Campus. Megan Robbins, Kristin Noga, and I work together in Revit to create the design as seen above. I worked with a Lumion free trial (worse than Enscape IMO) to create the rendering and used Auto Cad to prepare a laser cutting file to create a scale model. Faculty and Staff of the library seemed to be enthusiastic about our rendition.
