

Mitchell River House

Individual Assignment / Design Studio I / First Summer 2023

Instructor: Lindsay Pew

Each rendition of this concept represents the prompt of a scenic single family home. My chosen location was along the Mitchell River in State Road, NC. The mountainous terrain led to a stair-stepped foundation, a wrap around deck on the top floor, and a shed roof aligned with the sloped site.

This project served as an introduction to creating concepts, Revit, scale models, and going through class critiques. The sketch on the previous page is a more recent revision and this page has the original painting from 2023.
